Sudhanshu Lohana

Full-Stack Software Engineer

Jaipur, Rajasthan, India | lohanasudhanshu8257@gmail.com | +91 7976761135 | Portfolio | LinkedIn | GitHub

Summary

Full-Stack Software Engineer with 2+ years of experience building scalable SaaS platforms, real-time messaging systems, and generative AI web applications using Next.js, React, Node.js, and AWS. Proven track record executing cloud migrations that reduced operational overhead by 50%, deploying automated user-retention funnels, and integrating stateful LangChain AI features that increased user engagement by 40%.

Skills

Frontend & State: React.js, Next.js (App Router), TypeScript, JavaScript (ES6+), HTML5 Canvas, Redux Toolkit, Tailwind CSS

Backend & Architecture: Node.js, Express.js, GraphQL, RESTful APIs, WebSockets, VoIP Systems, Microservices

Cloud, DevOps & Databases: AWS (EC2, Graviton, Amplify, S3), MongoDB, Mongoose, Vercel, Docker, CI/CD, Git

Integrations & AI Frameworks: LangChain (Context & Memory), Meta WhatsApp Business API, Exotel API, Tata Tele Voice/VoIP, Razorpay

Experience

Full-Stack Software Engineer, Gurucool – Jaipur, India — Jan 2024 – Present

- **Engineered automated user-retention workflows** triggering targeted SMS, WhatsApp, and email reminders for cart drop-offs and payment failures, recovering **25% of lost transactions**.
- **Architected production database migration to AWS**, reducing database infrastructure costs by **50%** while maintaining 100% uptime across 20+ active tenant storefronts.
- **Executed zero-downtime EC2 migration to AWS Graviton architecture**, optimizing compute efficiency and cutting monthly server expenditure by **20%**.
- **Developed stateful AI Astrologer Chatbot with long-term user memory** using LangChain framework, increasing user engagement by **40%** and extending average session duration from 3 to 7 minutes.
- **Integrated VoIP calling system, Exotel, and Tata Tele voice APIs** for real-time consultation scheduling, handling **10,000+ monthly calls** with a **99.8% connection success rate**.
- **Constructed a multi-tenant SaaS platform** empowering 20+ vendors to launch custom-branded storefronts, reducing onboarding time by **40%** via modular React/Next.js components on AWS Amplify and EC2.
- **Designed a GraphQL WebSocket dashboard** connected to the Meta WhatsApp Business API, facilitating targeted messaging campaigns that boosted conversion rates by **20%**.
- **Established team code review standards and architecture guidelines**, elevating codebase maintainability scores by **30%** across 5 core developer modules.

Projects

Converse – AI Web Application | *Next.js, Canvas, LangChain, Node.js, MongoDB* — github.com/Sudhanshu8257/converse

- **Created an AI One Piece Bounty Poster Generator** combining LangChain image pipelines and client-side HTML5 Canvas, generating **500+ customized anime posters** with instant rendering.
- **Built a multi-persona AI conversational engine** using Next.js, Node.js, MongoDB, and LangChain, simulating 10+ distinct personalities with under **300ms context response times**.
- **Optimized SSR and image rendering**, achieving a **92 PageSpeed Insights score** and page 1 organic search ranking for target keywords.
- **Implemented secure authentication** using JWT with refresh token rotation and IP-based rate limiting, blocking **100% of automated credential attempts**.

Education

Master of Computer Applications (MCA), Subodh College — 2024 – 2026

Bachelor of Computer Applications (BCA), Subodh College — 2021 – 2024
